**Press Release
Summary: TNC
International
is a financial
services firm
with an
impressive
record of
success and a**

solid reputation. We are often the first investor in innovative, technology-driven companies that seek to create new markets with significant growth potential.

Press Release Body: SINGAPORE, February 24, 2008. -- At **TNC International's** newly established Singapore office they specialize in acquiring distressed securities and asset recovery for shareholders.

Our primary focus is on Alternative investments and acquiring distressed securities for asset recovery purposes.

Our secondary focus is on high-quality seed stage and early-stage investing and take a labor-intensive, service-oriented approach in markets where we have direct experience.

This approach has allowed our investor clients to achieve income and growth levels that would not be remotely possible in traditional exchange traded stock and bond investments.

To ensure that each portfolio company gets the support it needs to succeed, we actively limit the number of companies we invest in.

This gives us an unusually high partner-to-company ratio and guarantees that our portfolio companies get the attention they deserve.

Our financial advisors craft effective solutions to investor clients' strategic growth needs through initial public offerings, private placements, private investment in public equity (PIPEs), mergers and acquisitions, valuations and fairness opinions, and other advisory services.

Our Investment team includes experienced professionals with diverse backgrounds, incorporating financial, legal, and accounting skills. Maintaining a focus on a limited number of industry sectors allows us to build an extensive network of business and financial relationships.

Our senior advisors strive to build long-term relationships with clients through personalized attention, a high level of integrity, and a commitment to provide timely, continuous support.

1. Our clients' interests always come first.
2. Our assets are our people, capital and reputation. If any of these is ever diminished, the last is the most difficult to restore.
3. Our goal is to provide superior returns to our shareholders. Profitability is critical to achieving superior returns, building our capital, and attracting and keeping our best people.
4. We take great pride in the professional quality of our work. We have an uncompromising determination to achieve excellence in everything we undertake.
5. We stress teamwork in everything we do. While individual creativity is always encouraged, we have found that team effort often produces the best results. We have no room for those who put their personal interests ahead of the interests of the firm and its clients.

6. The dedication of our people to the firm and the intense effort they give their jobs are greater than one finds in most other organizations. We think that this is an important part of our success.
7. Integrity and honesty are at the heart of our business. We expect our people to maintain high ethical standards in everything they do, both in their work for the firm and in their personal lives.

TNC International's Singapore based **Alternative Investment Unit focuses** on distressed and high-yield opportunities by investing in senior debt, mezzanine or equity instruments.

In addition, we provide asset management services to investment banks, financial institutions and value investors as well as advisory services to companies in financial distress or requiring assistance with their capital structure.

We also assist shareholders to recover their lost funds through Tax Minimization and Like Kind Exchange programs.
