Press Release Author: www.Olivei.net

Industry: [Software](#)

Press Release Summary: Atlanta, Georgia; November 4, 2008— As the only woman-owned, SEI authorized partner headquartered in Georgia, Olive, LLC is pleased to announce a public offering of the official SEI (Software Engineering Institute) Introduction to CMMI in Atlanta, Georgia, November 18-20, 2008.

Press Release Body: Atlanta, Georgia; November 4, 2008— As the only woman-owned, SEI authorized partner headquartered in Georgia, **Olive, LLC** is pleased to announce a public offering of the official **SEI (Software Engineering Institute) Introduction to CMMI in Atlanta, Georgia, November 18-20, 2008.**

Increasingly used by commercial companies and preferred by government agencies, **CMMI (Capability Maturity Model Integration)** has proven itself as the leading improvement framework for technology development organizations.

This three-day class provides a detailed overview of **CMMI for Development** and is intended for process managers needing to implement **CMMI** in their organizations, executives and managers wanting to monitor a **CMMI** program, and professionals wishing to deepen their knowledge of process improvement. Managers charged with determining a path for process improvement and those wanting to participate as **SCAMPI** appraisal team members benefit from the class as well.

Through a series of lectures, class exercises, and class discussions, participants are introduced to the 22 Process Areas, the Generic Goals and Practices, and the Specific Goals and Practices. Focus is given to the descriptions of the 5 Maturity Levels and the various Capability Levels within CMMI. Understanding how CMMI can be implemented in different organizations and a better knowledge of how CMMI can be used to meet an organization's process improvement goals is also discussed.

To register contact K. Scheie at PR@Olivei.net or register online at www.Olivei.net. Students receive 2.5 Continuing Education Units (CEUs) for this course.

About

OLIVE:

Olive, LLC is a woman-owned, process-improvement consulting firm located in Atlanta, Georgia. As an official SEI Partner, Olive is authorized to provide services including CMMI training, appraisals, and consulting. We are committed to helping our client base of Technology Development groups, Quality & Compliance departments, and Government contractors, understand, develop, maintain, and monitor quality and process performance systems.
