

During NAB 2009, ENENSYS showcase advance solution for Mobile DTV, Digital Terrestrial TV, and its latest innovative digital TV Test & Measurement products

Released on: April 21, 2009, 3:43 am

Author: Veronique Le Renard

Industry: [Telecommunications](#)

From 20th to 23rd April, ENENSYS will be present at NAB Show in Las Vegas, Nevada, US, at Booth SU10805.

ENENSYS will unveil its latest digital TV offering:

- Complete and multi-standard **Broadcast Mobile TV solution**; this solution is one of the most complete, reliable and innovative solution on the market which is already commercially deployed. From transcoding to the delivery of digital TV including IP encapsulation / multiplexing, this solution offers innovative features (Statistical multiplexing, bandwidth optimization, regionalization, ...). After successful DVB-H commercial deployment, the ENENSYS Mobile TV solution is ready for ATSC-MH.
- **End-to-end Single Frequency Network solution**; ENENSYS keeps on improving its SFN solution (from MIP insertion to broadcast delivery) to sustain its leadership position for delivering digital TV content over Single Frequency Networks and helping network operator to cope with SFN constraints.

- Latest **IP gateway** supporting the delivery of digital TV over DVB, ATSC, ATSC MH and DAB/DMB networks and supporting SFN and DTS characteristics,
- Its innovative **Digital TV test and monitoring products**: the monitoring probe for QoS network measurement (real-time monitoring and long term performance analysis), and its latest version of pocket size (DiviCatch) digital tv analyzer for lab and deployment network in depth analyzing.

Do not miss the demonstration on our booth of our DVB-T2 LabMod featuring high grade DVB-T2 modulation and dedicated signal generator for live transmission, field test operation, R&D or factory test measurement.

ENENSYS product manager Laurent ROUL will also take part in the Broadcast Engineering Conference planned on Wednesday 22nd April, from 2 to 6:00 pm for a presentation about **DVB-T2**. This conference will consider a global deployment of DVB-T2 standard and will point out the aspects which have to be carefully taken into account demonstrating ENENSYS expertise in the latest Broadcast standards.

About	ENENSYS	Technologies	SA
ENENSYS Technologies has years of experience in the design and manufacturing of Digital TV transmission systems. Offer ranges from Mobile TV, Digital Terrestrial TV, IP Distribution to Test & Monitoring solutions, with high grade services and trainings. Covered standards include DVB-H, T-DMB, DVB-T, DVB-T2, DTMB, Digital Cable, ...			

ENENSYS has over 200 customers in 50 countries. Customers are Broadcast & Network Operators, Telcos, Chipset Vendors, Receivers Manufacturers and Global System Integrators. Headquartered in Rennes, France, in the heart of the European Digital Broadcast Cluster, ENENSYS is a public company listed on Euronext Paris Stock Exchange (FR0010286252 - MLENS).
