

Pambra's - A Revolutionary 'must have' product for any woman

Released on: April 9, 2009, 2:49 am

Author: Pamela Haven

Industry: [Healthcare](#)

Invented by a woman, for women. Pambra's was created with you in mind. A lot of love and care was put into the creation of Pambra's bra liners. Pambra's are a one of a kind soft cotton bra liner used to absorb perspiration under and between the breasts with dual duty of adding comfort to irritating under wires and scratchy elastic. Wearing Pambra's reduces moisture that causes rashes, body odors.

Pambra's, the original bra liners has paved the way for a more comfortable way of life for thousands of women across the globe.

As one fan raved, "It's the little things in life that make all the difference. Every now and again you run into a product that just makes sense. One you didn't even know existed until you found it.

One that answered a problem us ladies with ample bust lines often contend with on a daily basis. One that works and serves a purpose and one that just plain makes life easier and that product is none other than Pambra's, the original bra liner."

Pambra's quality materials and workmanship is unsurpassed by any of the imposter liners. But, don't be fooled by imitations, If it doesn't say Pambra's then it is not the original. Pambra's carry multiple physician recommendations and are sought after by the medical field and breast cancer patients. Pambra's is creating new jobs by being made in the USA.

Accommodating all types of bras, there are no pins or tapes to fuss with and tests have shown that with a properly fitted bra, Pambra's liners stay in place. Many women wear them alone under the pendulum breast to eliminate skin on skin contact.

Pambra's has recently expanded their bra liners to include more colors and two new post mastectomy styles, a unilateral and bi lateral liner. Pambra's has also designed washable nursing pads!

Pambra's liners are made of a soft cotton blend fabric and come with 100% cotton inside, a unique blend of fabric and cotton that absorbs perspiration and keeps moisture away from the skin.

About
