

Lynx Systems Announces EasyMerge For Intuit MRI, Intuit Real Estate Solutions Commercial & Residential

Released on: May 27, 2009, 3:41 am

Author: [Lynx Systems Inc.](#)

Industry: [Software](#)

Lynx Systems is pleased to announce the official launch of EasyMerge with its "click-retrieve" simplicity. It connects the Microsoft Word Mail Merge process with Intuit MRI (Intuit Real Estate Solutions), ideal for producing blocks of text such as leases, letters, customer invoices and statements, and labels from check runs.

More

About

EasyMerge

EasyMerge has been developed on the Microsoft .Net platform and is fully integrated to the Intuit MRI system. It is ideal for both the commercial and residential user and would be of interest to those currently using Web and Windows

Advantages

of

EasyMerge

The main purpose of the application is to increase the reporting power of Intuit MRI and to save the user both time and money in report customizations and development of standard text requiring large blocks of text. A sample of the many uses includes the customization of forms, letters, leases, invoices with logos, customer statements, collection letters, multi-lingual documents.

An early adopter comments on the advantages of EasyMerge:

We are very happy with the success we've had [with EasyMerge] not only from the time savings aspect in completing these forms 'on-line', but the cost savings of not having these documents sent out for printing. The autonomy

and flexibility of making these changes in house is a huge benefit.
Rae Makarowski
Operations Manager
Midwest Property Management

How EasyMerge Works
It connects the Microsoft Word Mail Merge process with Intuit MRI.

It utilizes core Intuit MRI Functionality providing access to the Intuit MRI database, MRI programs, functionality and Advanced User Console. It employs the same high level of security features used in Intuit MRI to protect valuable data. It includes an automatic update of tenant records and attaches the new Word document to Property, Lease, Resident, etc.

It takes advantage of the MS Word Functionality providing increased report formatting ability and the ability to save exact copies of reports and forms sent out. In addition, it includes fully customizable Word document security features which protect reports from accidental editing after they're run, and prevents changes to documents after merging.

About Lynx Systems

The team at Lynx Systems is pleased to advise its many clients in Canada, the United States and Bermuda that we continue to expand our extensive range of consulting and support services for the Intuit MRI user. Our company is a specialist in supporting the Intuit MRI software and for more than eight years, was either an implementation partner or a distributor for the MRI system. In fact, the consultants at Lynx have been supporting the MRI system since 1994, and we continue to offer to the MRI user a full range of consulting services including system selection, hotline support, toolkit customization, report development, technical support, application training, data conversion, process enhancement, project management, system assessment, implementation support and out-sourced IT management.

As a firm of professional accountants, software specialists and business professionals, and, in our role as an independent consultant, we are able to provide our clients with unbiased advice about their software requirements - whether that means upgrading to a new version, tweaking the old system or looking at other software providers. In addition, we can identify various alternatives available for consideration including both short and long term options, as well as give feedback on the general costs, and pros and cons of the various alternatives.
