ISV Partner is dedicated to Oracle® Human Capital Management

London, UK – July 2009

Applaud Solutions today announced that it has become a Partner in the Oracle® PartnerNetwork. Applaud Solutions are a new cross market Independent Software Vendor dedicated wholly to producing solutions for Oracle® E-BusinessSuite HCM.

Formed in 2008, the founders of Applaud Solutions have all had over a decade's worth of experience in Oracle HCM and have worked on some of the largest UK projects in sectors including Local Government, Central Government, Retail, Finance and Telecommunications. Their goal is simple: create integrated solutions that are in demand from Oracle HCM customers, built to the same world class standard as that provided by Oracle development.

Early solutions proving popular with early adopters include integrating Microsoft Outlook with Oracle® Learning Management and a new graphical user interface for Managers to schedule holiday bookings from within Oracle® Self-Service HR.

Applaud Solutions are embarking on validating the integration of their solutions through Oracle's Application Integration Architecture (AIA) for Partners validation process.
