[Malibu, CA] — Cliffside Malibu, an elegant recovery center on the Malibu coast, has long been a leading light in the California treatment community. Now, the center is pleased to announce its renewed commitment to helping eating disorder victims achieve physical and psychological wellness.

Eating disorder treatment is a delicate art form. To be successful, it has to be administered exactly the right way, with a nuanced attention to detail. The best treatment facilities are those which pay closest attention to the unique individual needs of their unique individual

clients. In the end, the healing process can't go forward on any terms other than those.

That principle, in turn, is the bedrock of Cliffside Malibu's eating disorder treatment philosophy.

With its expert caregivers and posh amenities, Cliffside Malibu is a world-class institution. The center has always catered to an elite clientele. Now Cliffside is expanding its mission, with the goal of delivering the best eating disorder therapy on the planet to those who need it. From [Anorexia recovery](#) to Bulimia treatment, at Cliffside Malibu nothing less than excellence will ever be acceptable.

"Eating disorder recovery depends first and foremost on the quality of eating disorder treatment," said Cliffside Malibu Program Director Dr. Georgina Smith. "At Cliffside Malibu, we recognize that our treatment programs have the power to change lives, and we do everything in our power to live up to that responsibility. We believe that we owe that much to the clients who trust us with their health."

That sense of obligation, in no uncertain terms, is precisely what distinguishes Cliffside from its competitors.

There's no shortage of eating disorder treatment centers in Los Angeles. All too often, many of those clinics employ inexperienced or unqualified caregivers. Predictably, these facilities generally fall short of the promises they make to their clients—with disastrous consequences for those clients and the people who care about them.

Given the stakes in the eating disorder recovery process, that sort of failure is simply unacceptable.

"Eating disorders ruin lives," said Patricia Freeberry, Cliffside's Clinical Director. "Eating disorder treatment can help to fix what's broken, but only if it's delivered by people who know exactly what they're doing. At Cliffside Malibu, our eating disorder specialists are the best in the world at what they do."

Eating disorder victims don't need to be told what they stand to lose in the fight against their diseases. What might not be so obvious, though, is the value of what they stand to win. Cliffside Malibu helps clients rediscover life as they used to know it, before anorexia and bulimia made them strangers to everything and everyone they'd ever cared

about. It's hard to imagine that any lesson could ever be more worth learning than that.
