[Malibu, CA] — Sunset Malibu, an exclusive treatment center on the California coast, has long been a transformational force in the field of rehabilitation and recovery. Now, Sunset is announcing its redoubled efforts in the fight against eating disorders.

Anorexia nervosa and bulimia are diseases. Like all diseases, they exist outside the willful control of their victims. No one ever decides to be sick. And, by the same token, no one can ever simply decide to get better. In the end, those individuals who try to recover without professional eating disorder treatment are invariably doomed to fail.

The good news, though, is that Sunset Malibu's eating disorder treatment programs really do change lives.

With its world-class caregivers and elegant accommodations, Sunset Malibu is an unparalleled recovery destination. The center has always catered to upscale individuals from every corner of the globe. Now Sunset is renewing its commitment to its core values, with the goal of delivering specially-tailored eating disorder treatment to individuals who seek it. Even for [Teen Eating Disorders](#), the facility can help sufferers find the right treatment. At Sunset Malibu, the client's needs always come first.

"Eating disorders are an increasingly pernicious problem in America and around the world," said Sunset Malibu owner Richard Taite. "We believe that our focus on eating disorder treatment puts us at the fore of a growing field of therapy. More importantly, we know that our eating disorder treatment programs have a measurable impact on the lives of our clients. "

It's this forward-thinking philosophy that makes Sunset almost unique among its competitors.

Many drug and alcohol rehab facilities dabble in eating disorder treatment. But very few make a concerted commitment to the eating disorder recovery process. In fact, many of the most expensive eating disorder treatment centers in California provide their clients with insufficient levels of care. It should come as no surprise that many of those clients rarely achieve lasting success.

Taite insists that such shortcomings are unacceptable.

"Eating disorder treatment can literally be a matter of life and death," Taite said. "There are no second chances, no do-overs. At Sunset Malibu, we're humbled by the faith our clients invest in us, and we take our responsibility with the utmost seriousness. We believe that our record of success reflects our commitment to healing process."

Sunset Malibu has a long history of helping clients rebuild their lives from the ground up. Now more than ever before, the center promises to effect meaningful and lasting wellness for every individual who walks through its front doors. Anorexia nervosa and bulimia are awful diseases—but they aren't unconquerable. As Sunset's successful graduates have learned firsthand, there really is a tried-and-true way forward. As with all co-occurring disorders, Sunset Malibu treats eating disorders as a co-occurring disorder with drug and or alcohol abuse.
