

# Mr. SEO Offering Affordable SEO Recession-Busting Starter Packages

Released on: July 29, 2009, 4:15 am

Author: Greg Gaskill

Industry: [Internet & Online](#), [Marketing](#)

Seattle, WA, July 26, 2009— Mr-SEO, a U.S. based company that specializes in search engine optimization and internet marketing, has introduced four affordable seo starter packages to help businesses cope with the strained economy.

Launched in 2004, the mission of Mr-SEO has been--and remains--to offer top quality, [affordable SEO](#) and online marketing services. With its high quality customer service and standards of performance, the company is dedicated to help protect businesses from the "too good to be true" types of SEO offerings that will hurt a company's standing in the search engine rankings rather than help them.

President and owner Greg Gaskill knows that businesses need to ramp up marketing efforts during slow times, and slow times are often when they can least afford it. He and his team have made it their business to help companies thrive in the current hostile economic environment. However, he also knows that there is no such thing as "instant SEO" or "automated secret weapons" of online marketing, therefore these Business Starter Packages incorporate the same proven principles used in larger projects, but on a smaller scale. Although smaller in scope, these targeted services produce significant results – results that create a solid foundation to continue to grow from which can mean the difference between survival and failure in tough times.

These new packages offer businesses the same award-winning Mr-SEO quality including the company's Social Media Marketing, Blogging with Ghostwriter, Pay Per Click Advertising, and Search Engine Optimization packages, designed to get businesses into the top search engine rankings ethically and for long term success with affordable SEO and online marketing strategies.

One of the best features of Mr. SEO's offerings is the mix-and-match option. Businesses can purchase any combination of service packages to customize the marketing to their individual needs and budget. This flexibility gives small businesses the power to:

- Ignite lead generation to increase sales
- Boost market awareness & build their brand
- Increase client retention and loyalty
- Enhance & maintain their image – critical during tough times
- Increase exposure to new markets and / or partnerships

You can see all the introductory Business Starter Package offerings at: <http://www.mr-seo.com/businessstarterpackages.html>

Mr. SEO is a Seattle, Washington based company that performs all work right here in the United States. With memberships in Washington State's Better Business Bureau and the Search Engine Marketing Professionals Organization (SEMPO), the company has been featured by Start-Up Nation, Linked-In, Resource Nation, Evan Carmichael, various E-Zine articles, and even received mention by The Wall Street Journal.
