Working closely with clients and using the latest technology, Brasil Investments helps foreign investors find prime real estate in Brazil. Whether you're seeking pre-construction or fully built properties, Brasil Investments will not only help you find properties that meet your needs, but they will keep you informed, every step of the way, of all developments related to your investment.

Brazil, South America
(BRASIL INVESTMENTS)
September 22, 2009 –
Brasil Investments is leading the charge to help foreign investors find prime real estate properties in and around Brazil. The land division program within Brasil Investments has created a team of knowledgeable experts who specialize in acquisition and

development of real estate properties. These experts include a legal team that understands the intricacies of Brazilian law and a knowledgeable group of financial authorities who understand the Brazilian real estate market inside and out.

Properties that are offered by Brasil Investments meet the highest standards. We work closely with all our investors and ensure that they are only selecting a top property from the best available land and properties available. The investment professionals on staff help guide investors through the process of purchasing land for both personal and commercial use and only offer properties that they would be willing to purchase for themselves.

Brasil Investments offers the widest range of first-class Brazilian properties available from any single firm and offers a 1,000 Euro cash back incentive for investors upon receipt of a signed contract and first payment. In effect, this is to show that the team at Brasil Investments values their clients and wants to instill the highest amount of confidence possible with

their investors.

Brasil Investments also employs a multi-lingual staff that works with leading international law firms to ensure that every client receives information that is legally up-to-date and accurate. This also establishes that each investment property has made its way through all legalities required by both Brazil and whichever foreign nation an investor might be from. By taking these measures, Brasil Investments can assure their customers that all real estate transactions have been legally approved, necessary permits have been attained, inspections have been completed and all title deeds and licenses are present and accounted for.

For additional information regarding Brasil Investments and a complete prospectus on properties offered, please contact them through their Web site at <http://brasilinvestments.com/contact>.
