

Clearwater & Pinellas County Residents Now Have Alternative Options To Weight Loss, Liposuction, Hair Removal, And Plastic Surgery.....

Released on: September 30, 2009, 8:15 am
Author: RMM/TCHC
Industry: [Healthcare](#)

Clearwater Aesthetic Medicine has a full [aesthetic](#) line to offer patients safer & less expensive options to surgery. This is no spa! Clearwater Aesthetic Medicine is a fully operational medical facility. Patients are under the care of Jayam K Iyer M.D, medical staff or an esthetician. Patients who might have otherwise considered liposuction, a full body lift, or a surgical facelift, can now get similar results using the increasingly popular Velashape or skin enhancing laser.

The Velashape is the first FDA cleared device approved for circumferential reduction and the treatment of cellulite. Reduce any body part. Dramatically reduce or remove unsightly cellulite. Lose weight, take off inches without enduring painfull, expensive plastic surgery. With basic

aftercare, results from Velashape can be life long.

Residents from Clearwater, Bellair, Clearwater Beach, Palm Harbor, Seminole, Indian Rocks, Largo, and St Petersburg who are battling the signs of aging can also take advantage of procedures like Botox injections, Dermal Fillers, Mesotherapy, Deep cleaning facials, enzyme peels & more. The facility is using familiar top of the line products like Botox Rx, Radiesse, Juve'derm, & Latisse.

For more lasting results, patients may consider [laser skin treatments](#). Clearwater Aesthetic medicine has one of the latest versatile lasers on the market made by Syneron. This multi-functional laser provides skin tightening, color correction, treats wrinkles, spider veins, age spots, sun damage, and permanent hair removal from all skin types.

If you've been bothered by inadequate or thinning eye lashes, also known as hypotrichosis, Dr Iyer can prescribe the new Latisse solution. Latisse is a treatment used to grow eyelashes. Making them longer, thicker and darker.

Are you tired of dieting , only to watch the weight come off your face, neck, and upper body? The HCG diet is a rapid weight loss program which targets areas of fat which are virtually impossible to lose using standard dieting & exercise methods. By using the hormone HCG , the body is able to burn off that abnormal fat around the belly and thighs. When under a physicians supervision and followed correctly, patients can lose an astounding amount of weight in just one month. If you are not a candidate for the HCG diet, Dr Jayam Iyer has other weight loss programs to accomodate each patient and meet your particular needs.

The facility also hosts one of the largest [pain management](#) practices in the area. Dr. Jayam Krishna Iyer is a Board Certified Aesthesiologist and a veteran pain management specialist. The Creative Health Center and Dr Iyer has been treating the residents of Pinellas County for the past 25 years. By providing pain relieving injections, steroid epidurals, radio frequency lesioning, medication and numerous alternative

techniques, chronic pain patients are able to enjoy relief from debilitating and distractive pain.

Clearwater Aesthetic Medicine is offering up to 50% discounts on many procedures. If you have been considering a lifestyle change, now is the time to get a great deal while improving your appearance and more importantly.....your health!
