

toKaos

A New Actionscript Encrypter Has Been Released

Released on: September 03, 2009, 9:13 am
Author: **K-SOL S.r.l.**
Industry: [Software](#)

toKaos is a desktop software application which allows you to encrypt/obfuscate your Adobe Flash/Flex AS3 application or Flash Document Class.

toKaos is able to operate directly on a copy of your source code providing you with a new encrypted/obfuscated source code.

toKaos is able to encrypt the identifier below:

- packages identifier
- classes identifier
- functions identifier (private, internal, protected and public)
- functions parameters identifier
- functions variables identifier
- class variables identifier (private, internal, protected and public)

Not only encryption, but toKaos is able to obfuscate your source code as follows:

- change package structure
- source compacting
- explode included files
- remove comments

After toKaos encryption/obfuscation your source code will be unreadable to everyone.

For more information contact toKaos support Team at support@tokaos.com or visit the product websites <http://www.tokaos.com> or <http://www.actionscriptobfuscator.com> (mirror)
