Shop a wide selection of lighting from the comfort and safety of home this winter flu season

(Milpitas, Calif.) October, 2009 -- AccessDiscounts.com - a leading supplier of grow lights, residential lighting and commercial lighting, is pleased to announce savings on its entire selection of lighting systems and supplies. In addition to offering a full range of lighting products for commercial and residential applications, www.accessdiscounts.com boasts a comprehensive selection of grow light systems, supplies and accessories for professional and amateur growers and gardeners alike.

Do-It-Yourself gardening is in the midst of unprecedented growth. Sparked by growing concerns over the effects of agro-chemicals on both food safety and the environment, consumers are increasingly turning to at-home cultivation of produce. According to the National Gardening Society, the number of households utilizing all-natural gardening methods has increased by 140% over the last five years.

Long familiar to gardeners in cold climates or with limited outdoor space, indoor growing offers a number of advantages: it enables year-round cultivation and a diversity of specimens unattainable through conventional outdoor growing. Grow lighting is also invaluable as a supplement to natural light, providing a solution for gardeners looking to sustain produce, plants and flowers through winter seasons.

Thanks to innovations in energy-efficient lighting, along with advances in fertilization and growing techniques, successful indoor growing is easier, more economical and more environment-friendly than ever.

Introduced within the last few years, LED lightbulbs represent the latest in commercial and residential lighting technology. Once used exclusively in

electronics, LEDs (light-emitting diodes) are now used to power lightbulbs which offer unmatched energy- and cost-efficiency compared with conventional lighting systems. LED systems are up to 33 times more efficient than fluorescent and last up to fifty times longer; they operate at much lower temperatures, dramatically reducing risk of fire or burning. And since these lightbulbs are non-toxic, they are environmentally safe.

Accessdiscounts.com is proud to be a leading supplier of LED grow light systems, offering "simply the best-priced and highest quality grow systems in the industry," according to Christina Roush, spokesperson for Access Discounts. As with all of Accessdiscounts.com's lighting systems, they are 100% USA-made and backed by a 30-day money back guarantee.
