Industry: [Healthcare](#)

A North Yorks Stage hypnotist is claiming that he can help women “think” that they have bigger breasts by just using the power of his mind.

David Knight has recently launched a new CD which tells listeners “Your breasts are growing...growing larger now” and is that confident in his technique that he offers a money back guarantee if listeners are not completely satisfied with the results.

The hypnotherapist is said to have an 85 per-cent success rate, saying: “Every lady’s breasts have been grown by the mind, the mind grows it, so the mind can enhance it.”

However earlier this week Mr Knight’s claims were tossed aside as the BBC program Inside Out demonstrated how easy it is to register as a hypnotherapist.

Although some people may think that hypnotherapy is the answer, breast augmentation offers a guaranteed permanent enhancement.

The Hospital Group, one of the country’s leading cosmetic surgery clinics offers a vast range of surgical implants as part of

its new Natrelle range.

With over 500 different shapes, sizes and textures, the Natrelle implant allows for a much more bespoke breast, which the patient has decided upon herself with the help of a dedicated specialist when undergoing a breast enlargement procedure.

In 2008, The Hospital Group saw a staggered 2,200 breast augmentations performed, making them one of the country's leading breast surgery providers.

Since The Hospital Group was established in 1992, it has grown from a small pharmaceutical company to one of the UK's foremost cosmetic surgery providers. The Group is committed to providing the very highest standards and all procedures are performed by an expert medical team in state-of-the-art facilities that are second to none.

For further information of The Hospital Group's range of surgical procedures, surgery-seekers should visit the website www.thehospitalgroup.org or call our patient care coordinators on 0845 762 6727.
