San Antonio, TX - Today's golf industry is flooded with instruction related to swing plane and sequence of motion leaving a gap relevant to the creative aspects of golf; mental and strategic golf. The newly launched StrategicGolfer.com bridges this gap with outstanding instruction teaching golfers how to shoot lower scores by "Playing the Game" better.

When the StrategicGolfer team launched their innovative and ground breaking site, StrategicGolfer.com, the vision was to offer golf lessons and tips to aspiring golfers focused on moving beyond swing mechanics to the creative fundamentals which are the foundation for great golf. Great golf is strategy, visualization, a solid routine, preparation, short game mastery, and mental toughness...in short, great golf is about "Playing the Game", and is the core focus of StrategicGolfer lessons and golf instruction.

StrategicGolfer products are in high demand from golfers seeking a competitive edge or trying to learn the game properly from the beginning. E-books, software, video

lessons, and online golf tips make acquisition of their products easy and affordable for students and customers. The team also uses Facebook, Twitter, YouTube, videos and blogs to engage with prospective customers and students. The StrategicGolfer.com approach to "learning golf" is very simple. Learn a "simple" and effective golf swing and then find your best golf by learning how to "Play the Game". Pursuing the perfect golf swing is road well traveled leading to a dead end. The perfect golf swing is a myth.

Most of today's golf instruction embraces numerous golf instruction philosophies. Each of these philosophies has well known instructors and tour players providing endorsements in golf publications, videos, books, and internet instruction modules. One plane vs. two plane, stack and tilt, full body turn and release are just a few of today's golf mantras. Despite all of this swing instruction handicaps have not changed in the last 20 years. Meaningful and lasting golf improvement is best gained by following the example of golf's great champions...pursue a perfect mental and strategic approach to playing the game.

All great players have good fundamentals; however, fundamentals are only a small part of learning how to golf. Golf strategy, short game mastery, conditioning, practicing like a pro, and mental preparation are all essential elements of turning good golf into great golf. StrategicGolfer.com lessons and tips are dedicated to these topics.

About The Strategic Golfer Team:

Tim Hobby is currently the Director of Golf Instruction at his learning center in San Antonio. He has been an award winning golf coach and PGA Professional over the last 20 years. His experience includes a successful track record of helping beginners, ladies, juniors, high school and college golfers, highly ranked amateurs and professional golfers. Tim won the 1989 USGA Public Links Championship, and has played in the Masters and US Open Championships.

Steve Simmons is the contributing author, editor, and publisher of the StrategicGolfer.com website and lesson series. Steve is an accomplished single digit golfer and successful business person. Steve is passionate about the game, golf's history and traditions, and the intricacies of competitive golf. Steve has an advanced understanding of computer and video based golf instruction.
