Industry: [Food & Beverage](#)

November 4, 2009 -- One of the top weight loss products in the world, Thermadrol, has announced the addition of a powerful rainforest herb to its weight loss formula; Gymnemia Sylvestre. This herbal ingredient gives what is regarded as the strongest weight loss product on Earth the added punch of curbing sugar cravings as well. We all know that sugar is a vice for many, and that a sweet tooth is hard to conquer, but Gymnemia Sylvestre can do just that.

Gymnemia Sylvestre may be hard to pronounce, but its affects on the body are clear thanks to countless studies that show its sugar craving fighting features. Studies of the herb have shown that it reduces blood sugar levels, while at the same time reducing the taste of sugar in the mouth. The taste is what makes sugar addictive, and with Thermadrol taking that away, cravings for sugar will disappear too.

Thermadrol, with this new ingredient, blocks sugar receptors of the tongue to help deal with obesity, but it doesn't stop there. In addition to stopping sugar cravings, it will also help users deal with hyperglycemia, high cholesterol, anemia and digestive problems. With this herb, Thermadrol has become a one-stop shop for all weight loss needs.

Thermadrol has developed a reputation for the past eight years of providing an excellent product that continues to improve and not only meet customer expectations, but exceed them as well. Now, with the added punch of Gymnemia Sylvestre, it seems that Thermadrol is once again pushing the limits and blazing new territory for weight loss products.
