Command Retail Highlighted as a Reader's Choice Recipient for Point of Sale

January 15, 2010 (Staten Island, New York) – Celerant Technology, a leader in the retail software industry, was selected as a preferred recipient of the 2010 Reader's Choice Award for Retail Accounting/Point of Sale.

"The inclusion of Celerant in the CPA Advisor's 2010 Reader's Choice Awards is an achievement that is representative of our endeavor to be in tune with our clients' needs" stated Ian Goldman, Celerant President and CEO. "Throughout the development of the Command Retail software, we strive to keep in mind that a company relies on all of its many facets working well together. The software is designed to address the needs of each user, including the important role of the accountant or bookkeeper. We understand that it is the combination of these facets that leads to the success of the company as a whole."

The CPA Advisor's 2010 Reader's Choice Award highlights software that provides a solution for the accounting industry that helps to automate accounting and bookkeeping procedures. The Accounting/Point of Sale award is geared toward programs that serve the small to mid-sized retail market.

"Our annual Readers' Choice Awards continue to show a trend toward the adoption of workflow optimization systems and other technology tools that help firms and small businesses run leaner and more profitably" said Senior Technology Editor, Isaac O'Bannon. "The awards are not a scientific study, but the voting results do offer an informal view into the professional lives of tax and accounting professionals, their technology and vendor preferences, and other insights."

[Celerant Command Retail](#) provides retailers with a complete software solution that fully integrates the point of sale on the front end with back office functionality, inventory control, warehouse, distribution, allocation, advanced reporting and E-Commerce. Command goes beyond these functions by integrating with professional third-party accounting software, including QuickBooks, MAS 90, and Great Plains, in addition to its own integrated accounts payable, accounts receivable, and general ledger functions.
