

The Best Oxycodone Drug Treatment Center In America

Released on: May 10, 2010, 12:53 pm

Author: **Sunset Malibu**

Industry: [Healthcare](#)

[Malibu, CA] - Sunset Malibu is traditionally regarded among the most successful drug treatment centers in California. With the goal of providing even better service to its clients, the oxycodone drug treatment center is announcing a renewed commitment to family-oriented therapy throughout the recovery process.

It's no secret that addiction can tear families apart. What might not be so obvious, though, is that drug treatment has to entail familial healing. The most effective [oxycodone drug treatment center](#) is the one that brings an addict's family members together for group counseling and therapy sessions. In the end, there's no better way to ensure the best possible outcome for everyone involved.

Those considerations, in turn, comprise the core of Sunset Malibu's treatment philosophy.

Sunset Malibu's caregivers are widely hailed as leading figures in the field. No less importantly, Sunset's elegant oxycodone drug treatment center offers residents an ideal setting for recovery. Sunset's clinical competence and unique

atmosphere have prompted upscale clients from all over the world to seek the center's care. With their latest initiative, Sunset's administrators hope to provide even better service to their patients.

"Our clients invariably come to us with badly damaged home lives," said Sunset Malibu's owner. "Part of our role as an oxycodone drug treatment center is to provide a safe space in which family members can work to rebuild the relationships that addiction so often ruins. In fact, our family therapy services are among the most important that we offer."

Unfortunately, that commitment to family therapy is precisely what sets Sunset apart from its competitors.

Study after study indicates the correlation between intensive family counseling and long-term addiction recovery. But not every luxury drug treatment facility heeds the lesson. In fact, many of the most well-known oxycodone drug treatment

centers in Los Angeles actively isolate addicts from their families during the drug treatment process. More often than not, such strategies prove to be counterproductive over the long run.

Sunset administrators, for their part, assert that such shortcomings are inexcusable.

"Drug treatment doesn't happen in isolation," said a representative from Sunset Malibu's clinical team. "Our patients can only hope to achieve lasting wellness if they're supported by their loved ones during the healing process. We believe that the robust record of clinical success at our oxycodone and buprenorphine drug treatment center is heavily dependent on our commitment to family therapy."

Sunset Malibu's expert caregivers are keenly aware of the stakes faced by their clients in the fight against addiction. That's why they invest so much effort and energy in ensuring the long-term success of the healing process. It's also why Sunset is among the best oxycodone drug treatment facilities on the planet. Now more than ever before, the center's residents and their loved ones have reason to believe that tomorrow really will be better than today.

Sunset Malibu is a highly effective [buprenorphine drug treatment center](#) located in Malibu, California.
