## Waveform Technology Applies to SolarCurrents Utility-Owned Program

Released on: May 06, 2010, 2:28 am Author: Waveform Technology LLC

Industry: Internet & Online

TROY, Mich — Waveform Technology, a leading Metro-Detroit Internet service provider and data center operator, announced today their application to Detroit Edison's SolarCurrents Utility-Owned Program. Detroit Edison is looking for multiple businesses with suitable rooftops or level ground area to provide space for solar power generation plants. Waveform Technology is one of several applicants to the program.

If selected by Detroit Edison to participate, Waveform Technology will allow Detroit Edison to install a solar power plant on the roof of Waveform's Troy, Michigan Data Center. Waveform Technology plans to use the SolarCurrents program to increase the amount of renewable energy used to power the Michigan Data Center, one of Metro Detroit's largest public data centers.

"American businesses are increasingly reliant on Internet services which need data centers: from E-Mail and websites to mobile

applications and disaster recovery," said Waveform representative Noel Montales. "The problem is that we need a tremendous amount of electrical energy to power those services, and more often that not that electricity comes form 'dirty' sources, like coal and oil."

"If Detroit Edison chooses the Michigan Data Center as one of the sites for the SolarCurrents Program then we'll ensure that a fair portion of our electricity comes from a completely clean and renewable source: the sun," continued Mr. Montales. "It makes us greener, but more importantly, it makes the IT departments of our clients a whole lot greener!"

SolarCurrents is one of the largest distributed programs in the country, and Detroit Edison will generate 15 megawatts of renewable electricity through the Utility-Owned portion. More information about the SolarCurrents program is available at <a href="http://www.dteenergy.com/solar">http://www.dteenergy.com/solar</a>.

Waveform Technology is a privately held facilities-based Internet service provider and data center operator based in Troy, Michigan. Waveform offers a wide range of data services throughout southeast Michigan and operates a 400 mile fiber network. Waveform has provided Internet connections to small and medium sized businesses, as well as many education and non-profit organizations, since 1994. Waveform's Troy Data Center is a world class facility that provides colocation for tenants of all sizes. More information is available at <a href="http://www.michigan-colocation.com">http://www.michigan-colocation.com</a> or by calling 248-784-7000.
