Industry: Software

Chantilly, VA-- The U.S. Department of Commerce awarded Johnston McLamb a contract to provide proper electronic management of its controlled correspondence. Johnston McLamb was chosen to assist the Office of the Chief Information Officer in providing support to the Department in connection with its information technology needs, including the need to monitor "controlled" correspondence used by the Executive Secretariat and several Department bureaus. A product called WebDocFlowTM is the document and electronic records management system for workflow and accountability of Presidential communications, Congressional communications and Department records at Commerce. Johnston McLamb is the exclusive seller of WebDocFlow in the United States.

In addition to providing a variety of WebDocFlow support services, Johnston McLamb is also providing software support and maintenance and has arranged for hosting of the application. The contract provides for one base year and four option years.

Johnston (http://www.johnstonmclamb.com) McLamb а consulting firm specializing in business and IT management intelligence solutions, data visualization software, and geospatial applications. Founded in 1991, Johnston McLamb strives to help clients reach their goals by implementing both new and proven technologies. In recent years, Johnston McLamb has won several industry awards including the USPS Quality Supplier Award, the 2008 Oracle Spatial Award, the Computerworld Excellence Business Intelligence Perspectives Award, and several others.
