Streamline.net Unveils New Value Hosting Packages

Released on: June 09, 2010, 03:36 am

Author: Streamline.net
Industry: Internet & Online

Streamline.net, a leading UK provider of value web hosting, has unveiled its new range of packages that once-again drive the standard for value-formoney in the hosting market.

The new web hosting range is suitable for both consumer and small business customers alike and features a new entry price equivalent to £1.75/month including VAT. In addition to its low pricing the packages also feature sizable web space, inclusive tools to build and promote a website and unlimited website traffic. Streamline.net is also launching a Pay-As-You-Go option for its hosting, which is ideal for individuals wishing to experiment with an idea on the Internet. Furthermore, new customers signing up to eligible packages will receive 1 free .COM domain registration for 1 year. The new range is designed to address the growing UK market for low cost web solutions.

The new <u>Streamline.net</u> hosting range comprises 4 package types. Both the <u>Starter hosting package</u> (500MB web space) and the <u>Personal hosting package</u> (3GB web space) are packed with features and benefit from instant set-up and unlimited website traffic. Both solutions include Streamline.net's, easy-to-use 10 page SiteBuilder tool for creating a professional looking website within minutes. The Plus package (10GB web space) also includes 1 free .UK domain name, 1 MySQL database and 5 anti-virus and spam protected mailboxes.

Streamline.net's new flagship Multi-site package (20GB web space) provides improved functionality at a highly competitive price. The solution can deliver up to 10 separate websites, unlimited personalised mailboxes and webmail, and provides both raw log files and SSH access. With support for all main scripting languages (ASP, PHP, Perl, Python), the package is suitable for web professionals and growing businesses. Significantly, all Streamline.net hosting packages are available in either Linux or Windows at no additional cost.

Steve Holford, Marketing Director at Streamline.net, said, "Our new packages provide the highest possible specification at very low monthly prices. Streamline.net has always focussed on delivering long-term value for money and advanced features without the premium price. We have invested heavily in both product development and customer care to ensure our packages meet all expectations. For users that wish to lower their costs but not their performance, our web hosting is the ideal choice".

Web hosting and domain registration prices have rarely been cheaper in the UK market. As the market leader for value web hosting, Streamline.net can offer a high quality professional, reliable service at low cost. Customer websites are hosted in a state-of-the-art UK data centre, and customers receive free technical support by phone or email. Streamline.net offers a comprehensive range of web solutions including domain name registrations, email packages and tools for online marketing.
