

TES S/S 2011 Men's Luxury Accessories In Alligator And Calf Colored By Hand

Released on: June 08, 2010, 05:38 am

Author: [TES](#)

Industry: [Apparel & Fashion](#)

TES www.tessrl.it announces the first collection of up and coming designer Marco Vaccari. The collection will be presented at the TRANOI Parc Royal Showroom for 4 days during the Paris Menswear Fashion Week, June 24th - 27th. The collection is open to guests of the TRANOI Fashion Tradeshow.

TRANOI is an exclusive Fashion Tradeshow marked for its ability to launch unknown designers into household names. Far from the commercial mass Fashion Tradeshow, it focuses on emerging talent and authentic innovators.

THE MATERIAL IS
NOT ALIVE, BUT IT
HAS THE QUALITIES
OF LIFE.

In a few short months TES has received international acclaim, with distribution through luxury department stores L'Eclaireur in Paris and Strasburgo in Japan (Ginza).

TES is also opening distribution in the Middle Eastern, Russian, Asian, American and European markets via collaboration with the [Damasco Showroom](#) located at Via Senato 6, Milan, Italy www.damascosrl.it.

The Spring Summer 2011 Collection represents a masculine approach to the contemporary. Through 4 lines:

TRADIZIONI, Traditional craftsmanship

REVERSIBILE, Reversible belts in super soft calf leather

TINTO A MANO, Hand Colored alligator and calf leather

QUARTA LINEA, The 4th line offering a more robust approach to the men's accessory

The collection is a union of couture, taking into consideration material, workmanship and liberty of form. The material itself, which is painstakingly sourced, hand treated, sewn and dyed, becomes a point of departure for a dandy and refined man.

Creativity is rarely enough to create luxury. The TES Men's accessory is an intersection between the skilled ability of the Vaccari family, experts in the field of belt and wallet creation and design of 28-year-old Marco Vaccari.

All work is completed in the TES atelier in the small town of Castelfranco Emilia, a region known for its leather-working heritage. Accessories are produced by artisans in Tuscany, and leathers are internationally sourced in accordance with the CITES convention.

The collection is defined in its characteristic details. Soft calf leather is hand braided, not machine braided, so that the tip is a real "point" and not a straight edge cut. The sides of each belt, the interior of the belt holes and belt tip are hand colored to leave no detail unfinished. Belts are lined with the finest quality calf, and buckles are individually created not mass produced.

Over 40 pieces of the Spring Summer Men's Collection will be on view during the Paris Men's Fashion Week at the Parc Royal Tranoi Showroom, 10 rue du Parc Royal, Paris 3 www.tranoi.com. Subsequently the collection can also be viewed at the Damasco Showroom, Via Senato 6, Milano, or by visiting www.tessrl.it.
